

Bufferreader:-

```
import java.io.FileReader;
import java.io.BufferedReader;

class main{
public static void main(String args[])
{
char array[]=new char[100];
try{
FileReader file=new FileReader("input.txt");

BufferedReader input=new
BufferedReader(file);

input.read(array);
System.out.println("Data in file:");
System.out.println(array);

input.close();
}
catch(Exception )
{
e.printStackTrace();
}
}
}
```

Output:-

```
C:\Users\vijen\Desktop\java codes>javac ifloop.java

C:\Users\vijen\Desktop\java codes>java ifloop.java
a is less than 10
```
