

## Buffer:-

```
import java.io.FileReader;
import java.io.BufferedReader;

class Main
{
public static void main(String args[])
{
char array[] = new char[100];
try{
FileReader file = new
FileReader("input.txt");
BufferedReader input = new
BufferedReader(file);
input.read(array);
System.out.println("Data in the file");
System.out.println(array);
input.close();
}
catch(Exception e){
e.printStackTrace();
}
}
}
```

## Output:-

```
C:\Users\vijen\Desktop\java codes>java buffer.java

C:\Users\vijen\Desktop\java codes>java buffer.java

C:\Users\vijen\Desktop\java codes>"C:\Users\vijen\Desktop\Visual Studio Code.lnk"
```
